

# PROJECT EV

## Project EV Pro Earth

### FEATURES PACKED AS STANDARD

We pack our products with the best features, so you can make the most out of your EV charger.

Our Pro Earth charging range eliminates the need to install any additional earth spike, which means no extra costs & an easy install.

\*Pro Earth only applies to SE AC charger models.

Project EV chargers work in harmony with solar panel technology, meaning you can charge your vehicle using the green energy generate by your solar system.

\*Solar compatibility only applies to single gun AC charger models.

Secure your charging cable with Project EV's cable lock system. Lock your originally untethered cable to your charge point and vehicle, ensuring user peace of mind, and full protection.

All Project EV AC chargers have the ability to dynamically load balance, ensuring that the power of your household is distributed evenly across all your electrical appliances.

Project EV chargers with a dual gun, or triple gun, outlet have the ability to charge multiple vehicles simultaneously.

The entire Project EV range comes with onboard RCBO isolation as standard. Enabling you full electrical protection, ready out of the box.
