

Easee One

Small. Smart. Full of power.

Easee One is intelligent and adapts to all electric vehicles, power supplies and mains. No need to think about technical specifications – the Easee One will automatically detect what power the vehicle requires. Built to comply with UK regulations, the Easee One comes with both integrated RCD protection and open PEN conductor protection.

- With Easee One, you can charge up to 3x times faster than with a regular outlet. It charges as quickly as possible with the available capacity and provides you with the highest charging power.
- You can have up to 3 Charging Robots on one fuse. All connected cars can be charged at the same time, and the available power is distributed automatically and dynamically between the vehicles.
- Easee One charges on single phase power and supports charging up to 7 kW. It has a Type 2 universal charging connector.
- The Charging Robot is equipped with built-in e-sim and mobile communication.

Accessories

Easee App

The Easee app lets you manage your Easee Charging Robots. In the app, you have access to all your facilities and the various Charging Robots. The app is available for both Android and iOS. Download directly from Google Play or the App Store.

Why use the Easee App?

Anytime, anywhere

With the Easee app, you always have full control over your Charging Robots, whether you are at home or on the go. The Easee Robot is always connected as it supports both WiFi and comes with built-in e-sim. You can check the status of the charger, adjust the charging power and schedule a charging session.

EASEE EV

Easee have been on a mission to create the world's smartest EV charger. Their commitment to sustainability has led to them developing a charging robot that is 69% smaller and lighter than other comparable electric chargers.

To keep things as simple as possible, they only make a single model that is universal and easy to install. The Easee charger is also suited for any install, commercial or domestic.

They've grown to over 100+ staff from their Norway base over the last 3 years. In 2020 Easee delivered over 70,000 charging robots (*or just car chargers to us*), with 500k predicted in 2021.

WHY CHOOSE EASEE?

We've collected some of the best reasons to choose their EV charging solutions here:

- Brand new product on the market
- Cheaper than other competitors, with stock ready to ship
- O-PEN comes built in, saving you money on each install
- Compatible with every car currently on the market.
- Beautifully sleek design

Not solar compatible
