

# SYNC EV

Harness the power of SYNC EV

The future of compact car home charging

**SYNC EV is a leading manufacturer of domestic electric vehicle chargers across the UK. Our home car charger is reliable, stylish, very competitively priced and covered by our 3 year manufacturer warranty.**

## *Home Charger*

**7.4KW Charger**

**Socketed and Tethered - 5m**

**1 x 40A MCB**

**Up to 2 hours fitting time**

**Hand over and App training**

**SYNC EV home charge Point is the most discreet compact feature rich smart charger available in the UK**

## **Instant control via your App**

Start, stop and schedule your charging with our App. Set your charger to Plug & Pay, simply plug in and start charging your car. Alternatively, schedule your charge start and stop times to take advantage of lower tariffs or solar electricity if you have solar panels.

# Choosing the right type of car charger

## *Size*

Discreet and compact, we let the tech do the talking, not the size. Fitted inside your garage or outside, the charger is fully weather proof and will suit any property... If you want a charger that will blend into your property then the Sync EV charger is for you.

## *Speed*

Charging speed is measured in KW, in general the higher the KW the faster the car will charge. We recommend opting for the 7.4KW charger to allow for faster charging time. Even if your current car may be limited to 3.6KW, your next car may not be. Using a faster charger will not damage a restricted car...

## *Cost*

Our chargers are competitively priced. We will apply for the OLEV grant on your behalf... so no need to worry. We pride ourselves on offering the most cost-effective charging solution for your home or work.

## *Compatible*

Our chargers are compatible with all vehicles. They are untethered which means you can plug in any cable which is suitable to your vehicle. A tethered charger, which has the cable permanently attached to the charger may be suitable for your current vehicle, but may not fit any future cars you may own.

## **What the future has been waiting for.. Simple, cost effective compact home car charging**

Sync EV are a leading manufacturer of domestic electric vehicle chargers across the UK. Our Home Car charger is reliable, stylish, very competitively priced and covered by our 3 year manufacturer warranty.

As the majority of the charging of your car will likely be at home it is essential that you choose a company like ours who have the necessary experience and knowledge to carry out a safe and efficient installation.
